■ Problem 1.1

(5 points) Please share a few areas in which you would like to address questions using data.

Solution: As a software developer, I'm interested in collaborating with data driven/ai startup in the following fields:

- Telecom: to build a realtime account-based marketing intelligent process. [1]
- Findtech: anti-money laundering detection. [2]
- Food: a drone network to generate image/infrared data to avoid excessive use of fertilizer. [3]

■ Problem 1.2

(optionally) Please feel free to share your questions of interest.

Solution: A year (or more) ago, what motivated you to study data science? Could you remember it?
